

Study Group Icon & Notes Summary Matrix Dry Creek Landscape, Dolores 5/18/'05

Primary Use	Concern	Opportunity
Grazing	Altered Landscapes	Disperse Uses
Hiking	ATV	Encourage Multiple User Groups to cooperate
Hunting	Commercial use	Grazing
Multiple Uses	Grazing	Loop routes
Nature Observation	Law Enforcement	Motorized Loop Routes
Traditional Uses	Mixed Rec Use Conflict	Multiple recreation Use
Wildlife Habitat	Motorized/Non Motorized conflict	Multiple Uses
Outstanding Features	Oil & Gas	Restoration
Multiple Uses	Riparian degradation	Riparian restoration
Natural Setting	Vandalism	Science Collaboration
Views/Scenic Resources	Weeds & Invasive Species	User Stewardship
Wilderness	Wildlife	Wildlife habitat
Wildlife	ATVs are causing resource damage	Economic inputs of Oil and Gas development
Wildlife Habitat	Gas Dev. Encroaching on Sage Grouse	Grazing mitigates fire hazard, can improve habitat
Bald eagles, prong horn, wild horses	Gas roads cause weeds to spread	Habitat restoration
Good hunting opportunity.	Lowering of water table b/c of Gas Dev.	Maintain multiple uses
Important winter range	Oil & Gas development threatens water quality	More sheep grazing
Oil & gas is good income	Oil & Gas is fragmenting Sage Grouse habitat	Protect G. Sage Grouse from oil & gas development.
Oil and Gas changing natural character of area	Oil and Gas changing natural character of area	West Lone Cone Road should be reopened
Versatile terrain , suitable for many uses		Wetland restoration
		Wildlife monitoring in grazing areas
