

Lakes Landscape, Columbine Meeting 1/25/'05

Study Group Comment Sheet Summary

Primary Uses	Concerns	Opportunities
All Uses	Adverse effects of Oil and Gas development on ecosystem health.	Cooperation between USFS and Landowners
ATV	ATVs are causing resource damage	Designate trails for motorized vs. non-motorized uses
Back Country Camping	Do not want to loose ability to continue motorized access	Educational Stewardship
Car Camping	Fire Restoration	Fire Restoration
Commercial Use	Grazing causing resource damage	Grazing mitigates fire hazard, can improve habitat
Fishing	Impacts of Timber harvest	Groomed cross country skiing
Forest Restoration	Maintain grazing rights	Keep area open to multiple use
Grazing	mineral development impacts	Limit use to designated routes
Hiking	Motorized uses disrupt solitude	Manage for ecosystem health, human uses secondary
Horse Packing	New roads from logging	Manage for riparian area health
Horseback	Over use is causing habitat damage, especially riparian areas	Mitigate fire hazard to residences
Motorized Summer	Overcrowding	More communication and cooperation between user groups
Multiple Uses	Proliferation of trails due to motorized uses	More Developed Camping Areas
Municipal Water Use	Residential Development	More trailheads
Nature Observation	Too much motorized use	New route creation
Non Motorized	Weeds spread along travel routes	Timber Harvest
Other		Timber Harvest of Fire Salvage Timber
RV Camping		
	Outstanding Features	
Snowmobiling	Areas for solitude	
Traditional Uses	Developed Camping Facilities	
Wildlife Habitat	Diverse vegetation	
	Existing roads and trails	
	Good wildlife habitat	
	High quality grazing range	
	Ideal for multiple use	
	Ideal for multiple use camping/recreation outings	
	Unique and beautiful scenery	
	Water Storage Infrastructure
