Uncompahgre Field Office

2012 Pilot Plot Plans-

- Continue testing restoration strategies in 4 area/16 plot pilot study
- Planting tests- salt tolerant species, long stem plantings, seedings
- Controlled burn plots- plantings, weed control

- Intensive monitoring (DU)
- Lessons learned-feed into next year's implementation plan

Uncompahgre Field Office

Dolores River Restoration Partnership has been instrumental in:

- Directing UFO's attention to this river system
- Assisting us in funding pilot plots and this year's implementation
- Providing support for project implementation
- Increasing our interaction with neighboring offices
- Improving quality of our restoration projects
