

Checklist of sensitive plant species with potential to occur on San Juan Public Lands in the Animas River watershed upstream of Bakers Bridge.

| PLANT ON SAN JUAN PUBLIC LANDS | DESIGNATION* |
|---|--------------|
| <i>Aliciella sedifolia</i> | FS Sensitive |
| <i>Carex oreocharis</i> | Highlight |
| <i>Cypripedium parviflorum</i> | FS Sensitive |
| <i>Descurainia kenheilii</i> | Highlight |
| <i>Draba graminea</i> | Highlight |
| <i>Draba malpighiacea</i> | Highlight |
| <i>Draba porsildii</i> | Highlight |
| <i>Draba smithii</i> | FS Sensitive |
| <i>Drosera anglica</i> | FS Sensitive |
| <i>Eriophorum altaicum</i> var. <i>neogaeum</i> | FS Sensitive |
| <i>Eriophorum chamissonis</i> | FS Sensitive |
| <i>Machaeranthera coloradoensis</i> | FS Sensitive |
| <i>Parnassia kotzebuei</i> | FS Sensitive |
| <i>Physaria scrotiformis</i> | FS Sensitive |
| <i>Salix candida</i> | FS Sensitive |
| <i>Salix serissima</i> | FS Sensitive |
| <i>Sphagnum angustifolium</i> | FS Sensitive |
| <i>Sphagnum balticum</i> | FS Sensitive |
| <i>Townsendia rothrockii</i> | Highlight |
| <i>Utricularia minor</i> | FS Sensitive |

* Explanations of designations:

FS Sensitive: on USFS Region 2 (R2) Forester's Sensitive Species list as of May 2010

Highlight: SJPL Draft Land Management Plan determines that management actions may be necessary in order to prevent listing under the ESA, or to achieve multiple use objectives.

ESA Candidate, Endangered, Threatened = listed as such under the Federal Endangered Species Act.
